INTEGRATED BORDER/SENSITIVE ZONE SECURITY SYSTEM

www.best-grup.com

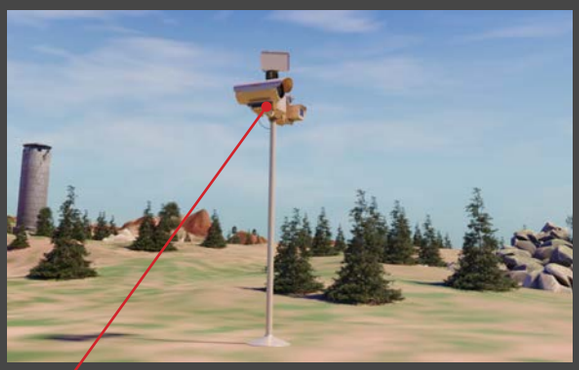
Best Grup manufacture effective technological autonomous turnkey solutions to ensure border security.

With the domestically developed automatic target detection and smart surveillance system, any threat that violates the border line is continuously detected and transmitted to the operator.

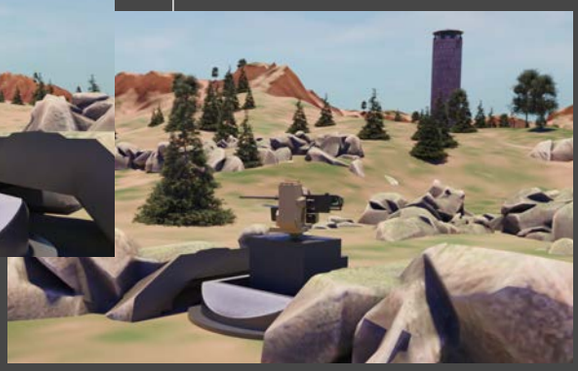
Detecting, recognizing, classifying threats to the border line with mobile or fixed, manned or unmanned sensor systems with gradual command control and secure communication infrastructure and fulfills follow-up tasks.

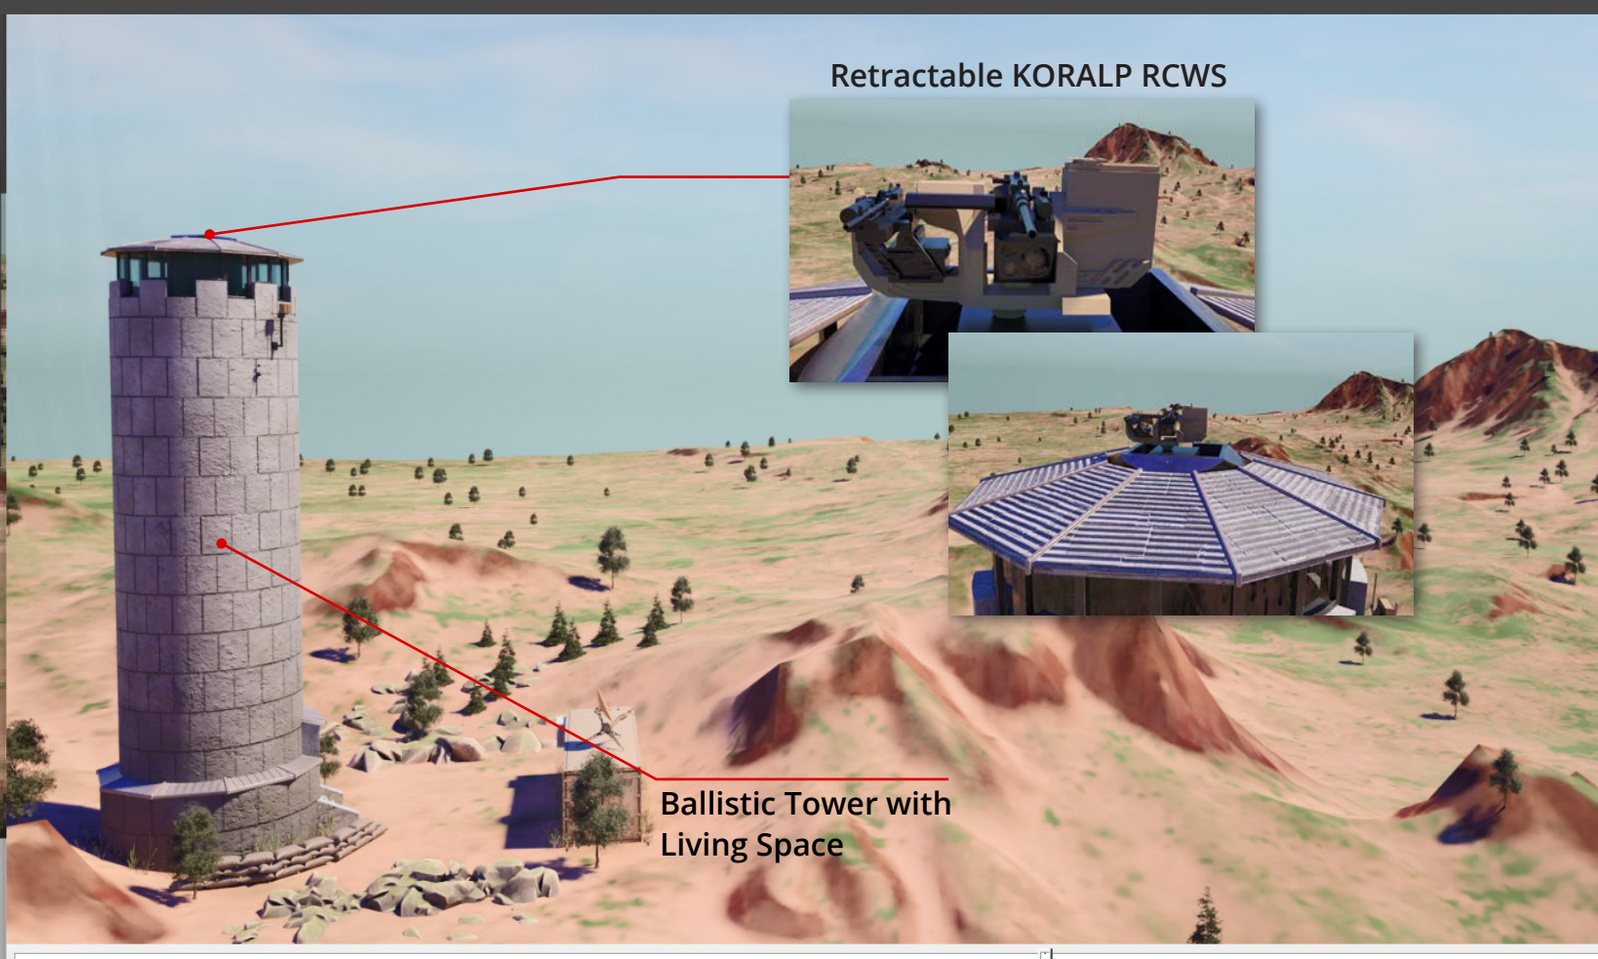
Awareness is provided in the selected region, decision-making and intervention coordination and monitoring of developments are carried out effectively with the support of the information system.

Seismic Sensors



1. Thermal Camera
2. Daylight camera
3. Personnel Detection Radar

Remote Command and Control Room




Retractable KORALP RCWS
